Рис. 1: Установка hugo

The screenshot shows the GitHub interface for creating a new repository. At the top, there's a navigation bar with the GitHub logo, a 'New repository' button, and a search bar. The main heading is 'Create a new repository'. Below it, a paragraph explains that a repository contains all project files and revision history, with a link to 'Import a repository' if one already exists elsewhere. A note states that required fields are marked with an asterisk (*). The 'Repository template' section features a dropdown menu currently set to 'HugoBlox/theme-academic-cv'. Below this, there's a checkbox for 'Include all branches' with a sub-note: 'Copy all branches from HugoBlox/theme-academic-cv and not just the default branch.' The 'Owner *' field shows 'SealDogg' with a dropdown arrow. The 'Repository name *' field contains 'SealDogg.github.io' and has a 'Checking availability...' status below it. At the bottom, there's a prompt for 'Great repository names are short and memorable. Need inspiration? How about **sturdy-system**?' and a 'Description (optional)' field.
